

Take the worry out of technical service—we'll be your support

Our Partners in Care Comprehensive and Biomed Partnership programs are designed specifically for your busy medical practice.

We know you don't have the time or the resources to worry about equipment when it needs repair or calibration. But when it does, you need a quick and cost-effective solution to help minimize equipment downtime and have it back into the hands of your caregivers when and where they need it.

With the Welch Allyn Support Plans, you will receive:

- Remote Technical Support—Troubleshoot issues, download updates and more using our trained technical staff and the Welch Allyn Service Tool
- Parts and Labor—Everything is included in your agreement
- Faster Turnaround Time—Prompt, dependable service to help ensure a fast first-time fix
- Loaner Coverage—Advanced replacement or access to loaners to ensure equipment is always available
- Free Shipping—All costs associated with shipping the product will be covered
- Training Discounts—Special pricing for clinical and technical training when needed and where available
- Calibration Discounts—Significantly reduced cost to have devices calibrated annually
- Accessory Protection—Depending on product, replacement of selected accessories, one per year, per device
